## Bag Filtration Systems

For Solids Removal

**The BF Series solids filtration systems feature a variety of sizes and designs for all flow rates and applications**

Our BF filters are built for industrial applications in new and existing small as well as large installations where solids need to be removed.

### ***The Solution***

A simple, economical and reliable solution for low or high flow filtration operations. The filters are offered in single or multiple bag housings alone or multiple vessels plumbed in parallel or series. Pumps and controls can be provided.

### ***Features Include:***

- ◆ Variety of constructions
- ◆ Flanged or NPT connections
- ◆ Polyester or polypropylene filter bags
- ◆ Fully assembled ready to operate
- ◆ Skid or no skid mounting
- ◆ Flow rates 2-1000 GPM
- ◆ Adjustable legs for variable height

### ***Materials of Construction Offered:***

- ◆ Coated carbon steel
- ◆ 304/316 SS/aluminum/polypropylene
- ◆ PVC/CPVC sch. 40 & 80 piping
- ◆ Pressure gauges, differential & isolated
